MODULE 1

AI for Mental Load Relief

lilihuman.com

WHAT THIS MODULE TEACHES

How to use AI as a “second brain” when your mind feels overloaded.

COPY-PASTE PROMPT

“ Act as my family life assistant. I’m feeling overwhelmed by everything I need to manage. Here is my brain dump: **[paste list]**. Help me organize it into categories, prioritize what matters most, and create a simple plan for the next 3 days.”

EXAMPLE

“ I need to buy groceries, email the teacher, plan dinner, schedule a dentist appointment, wash uniforms, order a birthday gift, and clean the kitchen.” ”

AI CAN SORT THIS INTO:

Urgent tasks

Needs attention now

Home tasks

Around the house

Kid tasks

Related to the kids

Errands

Out of the house

Things to delegate

Ask for help

Things that can wait

Not urgent right now

MISTAKE TO AVOID

Do not ask AI, “Help me organize my life.”

That is too vague.

BETTER:

“Here is everything on my mind. Sort it into categories and tell me what to do first.”

Remember:

- ✓ Get it out of your head
- ✓ Let AI help you sort it
- ✓ Focus on what matters most
- ✓ Take action one step at a time

You don't have to do it all. You just need a plan.

AI helps you breathe again.

“Give me realistic meals my kids might actually eat, with minimal prep.”

Why it helps:

- ✓ Saves time
- ✓ Reduces stress
- ✓ Saves money
- ✓ Less daily decision fatigue

You don't have to cook gourmet. You just need a plan that works.

AI helps you plan. You bring the love.

9PM+	Rest	Rest	Rest	Rest	Rest	Rest	Rest

MISTAKE TO AVOID

Do not let AI overpack your day.

Why it matters:
Over-scheduling leads to stress, burnout, and less time for what matters.

Add this line to your prompt:
“Leave buffer time between tasks and do not over-schedule me.”

SCHEDULING TIPS

- ✓ Plan your week on Sunday night
- ✓ Include meals and chores
- ✓ Add daily buffer time
- ✓ Protect family time
- ✓ Build in rest—you need it!

Progress, not perfection.

Common Mistakes = to Avoid =

Use AI smarter, save time, and make life easier for you and your family. ❤️

Start with one area, like meals or school emails.

3 Expecting AI to Be Perfect

AI gives you a draft. You make it yours. ❤️
