

5-Minute Wake-Up Routine You Can Do in Bed

Move slowly, breathe deeply, and stay in a pain-free range.

1 Full-Body Reach —
30 seconds

- Instruction:** Lie on your back and reach your arms overhead while gently stretching your legs long.
- Form cue:** Think 'long,' not 'hard.' Keep your ribs relaxed.
- Modification:** Reach one arm at a time or keep your knees bent.

2 Ankle Pumps and Circles —
30 seconds

- Instruction:** Point and flex your feet, then make slow ankle circles in both directions.
- Form cue:** Move from the ankles without tensing your legs.
- Modification:** Work one foot at a time.

3 Bent-Knee Windshield Wipers —
45 seconds

- Instruction:** Lie on your back with knees bent and feet on the bed. Slowly let both knees sway side to side.
- Form cue:** Keep your shoulders relaxed and make the movement gentle.
- Modification:** Use a smaller range.

4 Single-Knee Hug —
45 seconds

- Instruction:** Bring one knee toward your chest, hold briefly, then switch sides.
- Form cue:** Keep the opposite leg relaxed and avoid pulling aggressively.
- Modification:** Hold behind your thigh instead of over your shin.

5 Heel Slides —
45 seconds

- Instruction:** With both knees bent, slowly slide one heel away, bring it back, then alternate.
- Form cue:** Keep your core lightly braced and your hips still.
- Modification:** Slide only halfway.

6 Glute Bridge —
45 seconds

- Instruction:** Press through your feet and lift your hips slightly, then lower with control.
- Form cue:** Squeeze your glutes and avoid arching your lower back.
- Modification:** Lift only an inch or perform a gentle glute squeeze without lifting.

7 Pillow Press Core Brace —
45 seconds

- Instruction:** Place a pillow on your thighs. Press your hands into the pillow while gently pressing your thighs back.
- Form cue:** Exhale during the press and keep your neck relaxed.
- Modification:** Press one hand and one thigh at a time.

8 Seated Bedside Reach —
45 seconds

- Instruction:** Sit at the edge of the bed, reach both arms overhead, then gently lean side to side.
- Form cue:** Sit tall and keep both hips grounded.
- Modification:** Keep one hand on the bed for support.

Finish with one deep breath in, one long breath out, then stand up slowly. If you feel dizzy, pause at the edge of the bed before getting up.
