

POSTPARTUM SAFE EXERCISES

STRONGER YOU. STRONGER MAMA.

Gentle, effective movements to help your body heal,
restore strength and support your motherhood journey.

YOU ARE:

- ✓ Healing
- ✓ Growing
- ✓ Adapting
- ✓ Doing amazing

Be proud of
every step.

WHEN TO START

Get clearance from your doctor. Generally safe to start around 6 weeks postpartum (vaginal) and 8–10 weeks (c-section).

FOCUS

Heal & Restore
Core & Pelvic Floor
Strength & Energy
Posture & Mobility
Mental Well-being

KEY PRINCIPLES

- ✓ Start slow & listen to your body
- ✓ Quality over quantity
- ✓ Breathe & engage your core
- ✓ Stay hydrated & nourish well
- ✓ Rest when needed

AVOID IF YOU HAVE

- Pain
- Heavy bleeding
- Dizziness
- Pelvic pressure
- Coning or doming

Stop & consult your doctor

MAMA TIP

Short, consistent sessions are more effective than long, infrequent workouts. You've got this!

1. CORE & PELVIC FLOOR ACTIVATION

Do these first to reconnect and activate.

1. DIAPHRAGMATIC BREATHING

- Inhale through nose, belly expands.
- Exhale through mouth, belly gently draws in.
- 5–10 breaths

2. PELVIC FLOOR CONTRACTION

- Gently lift and squeeze pelvic floor muscles.
- Hold 5 seconds, relax 5 seconds.
- 8–10 reps

3. TA ACTIVATION (ABDOMINAL BRACING)

- Gently draw belly button toward spine.
- Keep breathing.
- Hold 5 seconds, 10 reps

4. HEEL SLIDES

- Engage core.
- Slide one heel out and in.
- Keep pelvis stable.
- 8–10 reps each leg

CHECK YOUR CORE

Place fingers above belly button and lift head slightly.

Watch for:

- Coning/Doming
- Bulging
- Holding breath

If yes, go easier and focus on activation first.

2. GENTLE STRENGTH & STABILITY

Build strength gradually. Stop if you feel pain or pressure.

1. GLUTE BRIDGE

- Feet hip-width apart.
- Engage core and glutes, lift hips.
- Squeeze at the top.
- 10–12 reps

2. BIRD DOG

- Engage core.
- Extend opposite arm and leg.
- Keep hips level.
- 8–10 reps each side

3. MODIFIED SQUAT

- Feet hip-width apart.
- Sit back and down.
- Keep core engaged.
- 10–12 reps

4. WALL PUSH UP

- Hands on wall.
- Body in straight line.
- Bend elbows and press back.
- 8–12 reps

5. SIDE LYING LEG LIFT

- Engage core.
- Lift top leg, keep hips stacked.
- 10–12 reps each side

6. CLAMSHELL

- Keep feet together.
- Open top knee, pause, close.
- 12–15 reps each side

3. MOBILITY & RECOVERY

Improve posture, reduce tension and support recovery.

1. CAT-COW

- Inhale, arch back (cow).
- Exhale, round back (cat).
- 8–10 slow reps

2. CHILD'S POSE

- Reach arms forward.
- Relax and breathe.
- Hold 30–60 sec

3. THORACIC ROTATION (OPEN BOOK)

- Stack knees.
- Open top arm.
- 8–10 reps each side

4. HIP FLEXOR STRETCH (LOW LUNGE)

- Tuck pelvis under.
- Feel stretch in front hip.
- Hold 20–30 sec each side

5. SEATED SIDE STRETCH

- Reach arm overhead.
- Gently lean to side.
- Hold 20–30 sec each side

WHAT ABOUT WALKING?

Walking is a great way to start! Begin with short walks and gradually increase time and pace.

FOCUS ON HEALING FIRST

- 👉 Pelvic floor health
- 🕒 Core connection
- 👤 Good posture
- 💖 Proper nutrition
- 🌙 Adequate rest
- 🧠 Mental well-being

SAMPLE PROGRAM (3–5 DAYS/WEEK)

- 5–7 min Core & Pelvic Floor Activation
- 15–20 min Strength & Stability
- 5–10 min Mobility & Recovery
- 5 min Breathing & Relaxation

Start with 15–20 minutes total and build from there.

HELPFUL REMINDERS

- ✓ Wear supportive clothing
- ✓ Nourish your body
- ✓ Stay hydrated
- ✓ Sleep when baby sleeps
- ✓ Ask for help

You don't have to do it all.
One day at a time.

PROGRESS TAKES TIME

Celebrate small wins. Every step you take is a step toward a stronger, healthier you.

You are enough.
You are doing
an amazing job.

Pain

Heavy bleeding

Dizziness or shortness of breath

Pelvic pressure or heaviness

Pain during exercise

Always listen to your body and consult your healthcare provider when in doubt.

STRONGER EVERY DAY. FOR YOU. FOR YOUR BABY. FOR YOUR FUTURE.
