

5-Minute Wake-Up Routine You Can Do in Bed

Move slowly, breathe deeply, and stay in a pain-free range.

1 Full-Body Reach –
30 seconds

Instruction: Lie on your back and reach your arms overhead while gently stretching your legs long.

Form cue: Think 'long,' not 'hard.' Keep your ribs relaxed.

Modification: Reach one arm at a time or keep your knees bent.

2 Ankle Pumps and Circles –
30 seconds

Instruction: Point and flex your feet, then make slow ankle circles in both directions.

Form cue: Move from the ankles without tensing your legs.

Modification: Work one foot at a time.

3 Bent-Knee Windshield Wipers –
45 seconds

Instruction: Lie on your back with knees bent and feet on the bed. Slowly let both knees sway side to side.

Form cue: Keep your shoulders relaxed and make the movement gentle.

Modification: Use a smaller range.

4 Single-Knee Hug –
45 seconds

Instruction: Bring one knee toward your chest, hold briefly, then switch sides.

Form cue: Keep the opposite leg relaxed and avoid pulling aggressively.

Modification: Hold behind your thigh instead of over your shin.

5 Heel Slides –
45 seconds

Instruction: With both knees bent, slowly slide one heel away, bring it back, then alternate.

Form cue: Keep your core lightly braced and your hips still.

Modification: Slide only halfway.

6 Glute Bridge –
45 seconds

Instruction: Press through your feet and lift your hips slightly, then lower with control.

Form cue: Squeeze your glutes and avoid arching your lower back.

Modification: Lift only an inch or perform a gentle glute squeeze without lifting.

7 Pillow Press Core Brace –
45 seconds

Instruction: Place a pillow on your thighs. Press your hands into the pillow while gently pressing your thighs back.

Form cue: Exhale during the press and keep your neck relaxed.

Modification: Press one hand and one thigh at a time.

8 Seated Bedside Reach –
45 seconds

Instruction: Sit at the edge of the bed, reach both arms overhead, then gently lean side to side.

Form cue: Sit tall and keep both hips grounded.

Modification: Keep one hand on the bed for support.

Finish with one deep breath in, one long breath out, then stand up slowly. If you feel dizzy, pause at the edge of the bed before getting up.

5-Minute Nighttime Routine *You Can Do in Bed*

Keep the movements slow and easy. The goal is to relax your body, not push your flexibility.

1

Slow Belly Breathing — 45 seconds

- Instruction:** Lie on your back with one hand on your chest and one on your belly. Inhale through your nose, then exhale slowly.
- Form cue:** Let your belly rise more than your chest.
- Modification:** Place a pillow under your knees.

2

Full-Body Reach and Release — 30 seconds

- Instruction:** Reach your arms overhead and gently lengthen your legs, then completely relax.
- Form cue:** Stretch softly—no straining or arching.
- Modification:** Keep your knees bent or reach one arm at a time.

3

Bent-Knee Sways — 45 seconds

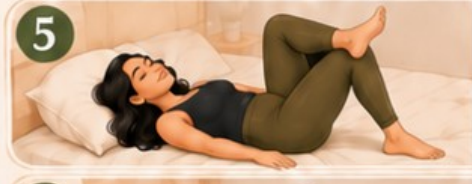

- Instruction:** Bend your knees with your feet on the bed. Let both knees move slowly from side to side.
- Form cue:** Keep your shoulders heavy and use a comfortable range.
- Modification:** Move only a few inches.

4

Single-Knee Hug — 45 seconds

- Instruction:** Bring one knee toward your chest, hold gently, then switch sides.
- Form cue:** Keep your head and shoulders relaxed.
- Modification:** Hold behind your thigh instead of pulling on your shin.

5

Reclined Figure-Four Stretch — 45 seconds

- Instruction:** Cross one ankle over the opposite thigh and gently draw the legs toward you. Switch halfway through.
- Form cue:** Keep the crossed foot flexed and stop before discomfort.
- Modification:** Leave the bottom foot on the bed without pulling the legs closer.

6

Heel Slides — 45 seconds

- Instruction:** Slowly slide one heel away until the leg is almost straight, bring it back, then alternate.
- Form cue:** Keep your hips still and move smoothly.
- Modification:** Use a shorter slide.

7

Pillow Press Core Release — 45 seconds

- Instruction:** Place a pillow over your thighs. Gently press your hands into it for three seconds, then fully relax.
- Form cue:** Exhale during each press and soften your jaw afterward.
- Modification:** Use very light pressure or press with one hand at a time.

8

Legs-Elevated Rest — 45 seconds

- Instruction:** Place your lower legs on stacked pillows or against the headboard and rest.
- Form cue:** Let your belly soften and make each exhale long and quiet.
- Modification:** Keep your knees bent with your feet on the bed.

♥ Finish with three slow breaths and let your whole body feel heavy against the mattress. Stop any movement that causes pain, numbness, tingling, or dizziness.
