

2-Minute In-Bed Core Workout

Perfect for a commercial break—no equipment,
no getting on the floor.

Do each move for 30 seconds and move straight into the next one.

1. Belly Brace + Heel Slides — 30 seconds

Lie on your back with your knees bent and feet on the bed. Gently tighten your core, then slowly slide one heel away and bring it back. Alternate sides.

★ **FORM CUE:** Keep your ribs down and your lower back comfortably supported.

♥ **MODIFICATION:** Slide only a few inches.

2. Bent-Knee Marches — 30 seconds

Keep both knees bent. Lift one foot a few inches off the bed, lower it, then switch sides.

★ **FORM CUE:** Keep your hips still and move slowly.

♥ **MODIFICATION:** Lift just the heel instead of the whole foot.

3. Pillow Press Dead Bug — 30 seconds

Place a pillow on your thighs. Press your hands into the pillow while gently pressing your thighs back into it.

★ **FORM CUE:** Exhale as you press and keep your neck relaxed.

♥ **MODIFICATION:** Press lightly or use one hand and one thigh at a time.

4. Glute Bridge Hold — 30 seconds

Press through your feet and lift your hips slightly off the bed. Hold and breathe.

★ **FORM CUE:** Squeeze your glutes and avoid arching your lower back.

♥ **MODIFICATION:** Perform small bridge lifts instead of holding.

Commercial-Break Goal

Complete one round per break. Keep every rep slow and controlled—the soft mattress makes balance harder, so quality matters more than speed.

SAFETY NOTE:

Skip any move that causes pain, dizziness, or numbness.
