20-MINUTE "Move With Me" DAILY PROGRAM

★ Consistency over perfection. Progress over time. Connection over everything. ♥

DAILY PROGRESSION

To keep this sustainable, progress slowly.

WEEK 1

Learn the flow.
Keep everything easy.

Focus: showing up,
learning, and having fun.

WEEK 2

Add one extra
round to the
strength section
if you feel good.

Focus: building stamina
and confidence.

WEEK 3

Make movements
slower: 3 seconds
down on squats
and bridges.

Focus: control,
strength, and quality
of movement.

WEEK 4

Add light resistance:
backpack, band,
or holding your child
only if safe and
controlled.

Focus: strength
progression with
awareness and safety.

Do not turn this into a punishment workout.

The win is showing up every day and making movement
normal, playful, and connected.

SAFETY NOTES

Keep the area clear, avoid hard jumping near furniture, and let your toddler opt in and out.
At 2.5 years old, attention will come in bursts. That is normal. ♥

FOR YOU

Stop or modify anything that causes
sharp pain, joint pinching, dizziness,
or worsening back/knee discomfort.

Sharp pain

Joint
pinching

Dizziness

Worsening
back/knee

FOR YOUR TODDLER

Avoid forced stretching, loaded carries,
or anything requiring perfect form.

No forced
stretching

No loaded
carries

No perfect
form required

Keep it safe,
playful, and fun

SIMPLE RULE

- ✓ Your toddler does not need to
"complete the workout."
- ✓ They need to copy, explore, laugh,
balance, squat, crawl, reach, and
feel successful.
- ✓ You complete the workout.
- ✓ They build the habit with you. ♥

THE WIN IS A
STRONGER YOU
AND A HAPPIER THEM.

♥ Strong in Body. Connected in Heart. Growing Together. ♥

90/90 HIP SWITCHES OR WINDSHIELD WIPERS 60 SEC

Sit on the floor, knees bent, and let both knees fall side to side.

TODDLER VERSION:

- "Move your knees like windshield wipers."

FOCUS: hips, internal/external rotation.

4

60 SEC

HAMSTRING WALKOUTS OR TOE REACHES 60 SEC

You can do slow hamstring walkouts. Your toddler can touch toes, knees, or shins.

FOCUS: hamstrings, posterior chain, body awareness.

5

60 SEC

WRIST ROCKS 60 SEC

Hands on floor, gently rock forward/back and side/side.

TODDLER VERSION:

- "Push the floor away."
- "Can your hands be strong like bear paws?"

FOCUS: wrist mobility, shoulder strength, coordination, body awareness.

Move slow. Breathe deep. Make it playful. You're building strong bodies and strong bonds. ♥

*Stronger in Body,
Empowered in Life.* ♥
