10-MINUTE BRAIN ACTIVATION

♥ PROGRAM FOR A 4-YEAR-OLD ♥

AT 4 YEARS OLD,
KIDS ARE IN A HUGE
DEVELOPMENTAL LEAP:

- ★ Imagination explodes
- ★ Language becomes more complex
- ★ Emotional awareness grows
- ★ Curiosity increases
- ★ Problem-solving improves
- ★ Attention span gets slightly longer

THEY LEARN BEST THROUGH:

♥ The key is making activities feel like:
“**play with purpose**”
– not lessons. ♥♥

★ **SHORT, ENGAGING,
JOYFUL & CONNECTED
= BIG BRAIN IMPACT!**

THE 10-MINUTE PLAN

1 MOVE
(2 MINUTES)

Animal Action
Game

Say an animal –
they move like it!
Examples: hop like
a frog, fly like a bird,
stomp like an elephant.

Builds: gross motor
skills, coordination,
body awareness

2 THINK
(2 MINUTES)

Quick Thinking
Challenge

Ask a fun question:
“What goes together?”
(socks, peanut butter
& jelly, a toothbrush
& toothpaste)

Builds: problem-solving,
logic, critical thinking,
vocabulary

3 CREATE
(2 MINUTES)

Imagination
Boost

Use a simple prop
(box, spoon, scarf)
and say,
“Let’s pretend!”

Builds: creativity,
language, pretend
play skills

4 SENSORY
(2 MINUTES)

Touch & Feel
Surprise

Feel a mystery bag
or texture.
Guess what it is!
(soft, bumpy, cold,
smooth, etc.)

Builds: sensory
processing, curiosity,
descriptive language

5 CONNECT
(2 MINUTES)

Share & Reflect

Ask:
“What was your
favorite part?”
Give a big hug!

Builds: emotional
connection, confidence,
self-awareness

QUICK TIPS TO MAKE IT WORK ♥

- ✓ Follow your child’s energy.
- ✓ Stay playful and flexible.
- ✓ Celebrate small wins.
- ✓ Narrate and describe everything.
- ✓ Repetition is powerful!

EXAMPLE NARRATION:

- ★ “You’re jumping so high!”
- ★ “What a creative idea!”
- ★ “That feels cold, doesn’t it?”
- ★ “You worked so hard!”

REMEMBER ♥

You don’t need fancy toys or
perfect plans. You just need
10 minutes of focused,
joyful connection.
**SMALL MOMENTS.
BIG IMPACT.**

A FEW TIPS TO MAKE THIS ACTUALLY SUSTAINABLE

SHORT • PLAYFUL • EFFECTIVE • REALISTIC

♥ 10-MINUTE DAILY BRAIN ACTIVATION PROGRAM (AGE 2.5) ♥

1. KEEP EXPECTATIONS LOW

If they lose interest after 3 minutes, that's normal.

Small moments still matter!

2. REPETITION IS GOOD

Toddlers learn through repetition, not novelty.

Repetition builds strong brain pathways.

3. FOLLOW ENERGY LEVELS

Some days they need movement. Some days they need calm sensory play.

Be flexible. You know your child best.

4. AVOID OVER-CORRECTING

Exploration matters more than "doing it right."

Celebrate effort, curiosity, and creativity!

5. NARRATE CONSTANTLY

Language exposure is one of the strongest predictors of cognitive development.

♥ EXAMPLE:

- "You stacked the blue block on top!"
- "That water feels cold!"
- "You worked hard on that!"

SIMPLE WEEKLY GOAL

If you consistently include:

MOVEMENT

LANGUAGE

SENSORY
EXPLORATION

EMOTIONAL
CONNECTION

PRETEND PLAY

...YOU ARE ALREADY SUPPORTING EXCELLENT
EARLY BRAIN DEVELOPMENT. ♥

Because you're keeping it short and playful, it's much more likely to become a **healthy daily ritual** instead of another stressful parenting task. ♥

You don't need more time. You just need more connection.

IMPORTANT THINGS

♥ THAT MATTER MORE THAN ♥

“EDUCATIONAL” ACTIVITIES

♥ At 2.5, the biggest brain builders are: ♥

RESPONSIVE CONVERSATION

Talk, listen, and respond. Back-and-forth builds brains.

EYE CONTACT

It builds connection, security, and communication.

REPETITION

Repeating songs, words, and routines helps the brain make strong connections.

LAUGHTER

Laughing together reduces stress and boosts learning and bonding.

MOVEMENT

Movement helps the brain grow and connect.

SLEEP

Sleep is when the brain organizes and grows.

OUTDOOR PLAY

Nature calms, focuses, and strengthens developing minds.

EMOTIONAL SAFETY

Feeling safe and loved is the foundation for everything.

♥
You do not need complicated setups or expensive toys.

The most powerful thing is:

**SHARED ATTENTION
+ ENGAGEMENT.**

Even 10 fully present minutes
can have a huge developmental impact.

Stronger in Body, Empowered in Life.
lilihuman.com

SKILLS THIS PROGRAM BUILDS

EXECUTIVE FUNCTION

- attention
- memory
- self-control
- flexible thinking

LANGUAGE DEVELOPMENT

- storytelling
- vocabulary
- communication

EMOTIONAL INTELLIGENCE

- recognizing feelings
- empathy
- regulation

MOTOR SKILLS

- coordination
- balance
- body awareness

CREATIVITY + CURIOSITY

The foundation of long-term learning.

MOST IMPORTANT REMINDER

At age 4:

connection matters more than perfection

engagement matters more than completing the activity

play IS learning

If your child is:

laughing

moving

imagining

asking questions

connecting with you

...their brain is already doing **important developmental work.**

Even **10** present, playful minutes daily can have a surprisingly powerful impact over time.

Little moments. Big growth.

MONDAY – “SUPERHERO BRAIN DAY”

MOVE

Superhero training:

- ★ jump over lava
- ★ crawl under lasers
- ★ freeze like a statue

This builds:

- ✓ coordination
- ✓ body control
- ✓ listening skills

BRAIN

Memory Mission

Place 5–6 objects on a tray.
Let them study for
20 seconds.

Cover tray.

Ask:

“What do you remember?”

For extra challenge:
remove one item.

Builds:

- ✓ working memory
- ✓ concentration
- ✓ visual recall

CREATE

Design a superhero:

- ★ powers
- ★ costume
- ★ sidekick

Ask:

“What problem
do they solve?”

Power:
Super
speed!

Costume:
Pink &
purple!

Sidekick:
Zap Cat

Problem
she solves:
She helps people
who are scared!

CALM CONNECTION

“What makes
someone
brave?”

TUESDAY – “WORD + STORY DAY”

MOVE

Act out verbs:

- ★ sneak
- ★ stomp
- ★ float
- ★ tiptoe
- ★ explode

BRAIN

Story Builder

Start with:

“A dinosaur
knocked on the
front door...”

Take turns adding
to the story.

Excellent for:

- ✓ sequencing
- ✓ language
- ✓ creativity
- ✓ listening

CREATE

Draw the
story together.

No pressure for
realism.

CALM CONNECTION

“What part
of the story
surprised
you?”

Stories build brains, hearts, and connections.
Play • Imagine • Connect

WEDNESDAY – “LITTLE SCIENTIST DAY”

MOVE

Fast vs slow challenge:

- ★ move like a turtle
- ★ move like a race car
- ★ freeze instantly

Supports self-regulation.

MOVE LIKE A TURTLE

MOVE LIKE A RACE CAR

FREEZE INSTANTLY

BRAIN

Simple experiment:

- sink or float
- baking soda + vinegar
- melting ice race

Ask:

“What do you think will happen?”
“Why?”

SINK OR FLOAT

BAKING SODA + VINEGAR

MELTING ICE RACE

Builds:

observation

prediction

curiosity

CREATE

Make “magic potions” with water, food coloring, spoons, cups.

CALM CONNECTION

“What did your brain discover today?”

Be curious. Ask questions. Explore together.
Little discoveries = big brain growth!

THURSDAY - “PROBLEM SOLVER DAY”

MOVE

Obstacle course:

- ★ balance line
- ★ jump pillow to pillow
- ★ crawl tunnel

BALANCE LINE

JUMP PILLOW TO PILLOW

CRAWL TUNNEL

BRAIN

Build a Bridge Challenge

Use:

- blocks
- books
- cups

Goal: make a bridge for a toy animal/car.

Encourages:

- 🧪 experimentation
- 🚩 persistence
- 📋 planning

CREATE

LEGO or block building challenge:

- tallest tower
- animal house
- rocket ship

TALLEST TOWER

ANIMAL HOUSE

ROCKET SHIP

CALM CONNECTION

“What was tricky today?”

This helps normalize challenge and frustration tolerance.

PROBLEMS ARE OPPORTUNITIES FOR GROWTH!
Keep trying. You're building amazing brain power!

FRIDAY – “MUSIC + PATTERN DAY”

MOVE

Freeze dance.

One of the best activities for:

- ★ impulse control
- ★ listening
- ★ nervous system regulation

BRAIN

Pattern copying:

- clap stomp clap stomp

- red blue red blue

Then ask them to invent a pattern for you.

Builds:

- 🧩 sequencing
- 🧠 auditory memory
- 💡 logic

CREATE

Homemade instruments:

- rice shaker
- spoon drums
- boxes

Experiment with:

- 🔊 loud / quiet
- 🕒 fast / slow

CALM CONNECTION

Which sound felt **exciting**?
Which felt **calm**?

Music, movement, and patterns make learning fun...
and help little brains grow in BIG ways!

SATURDAY – “NATURE EXPLORER DAY”

MOVE

Outdoor adventure:

- hopping
- climbing
- balancing
- running

Outdoor movement
strongly supports
brain development
and regulation.

HOPPING

CLIMBING

BALANCING

RUNNING

BRAIN

Nature scavenger hunt: Find:

- something rough
- something smooth
- something tiny
- something round

SOMETHING ROUGH

SOMETHING SMOOTH

SOMETHING TINY

SOMETHING ROUND

CREATE

Nature art:

- leaf collage
- rock painting
- stick letters/shapes

LEAF COLLAGE

ROCK PAINTING

STICK LETTERS/SHAPES

CALM CONNECTION

What did
you notice
outside today?

NATURE SPARKS CURIOSITY, CALMS THE BODY,
AND HELPS LITTLE BRAINS **GROW!** ♥

SUNDAY – “FEELINGS + CALM BRAIN DAY”

MOVE

Yoga or stretching:

- ★ cat stretch
- ★ star stretch
- ★ curl into a tiny ball

CAT STRETCH

STAR STRETCH

CURL INTO A TINY BALL

BRAIN

Emotion Detective

Use stuffed animals or pictures:

- ♥ “How do they feel?”
- ♥ “Why?”
- ♥ “What could help?”

Builds:

- ♥ empathy
- 💬 emotional intelligence
- 📖 emotional vocabulary

CREATE

Playdough, water play, sensory bins, coloring.

Calming sensory play helps regulate the nervous system.

PLAYDOUGH

WATER PLAY

SENSORY BINS

COLORING

CALM CONNECTION

“What made your heart happy this week?”

A calm brain, a happy heart, and loving connection help little brains grow strong!

YOU'VE GOT THIS!

Tiny moments of connection
create big brain growth.

Your child does not need perfect activities, expensive supplies, or long lessons.

What matters most is:

connection

consistency

play

language

curiosity

emotional safety

Keep it simple.

Keep it playful.

Keep showing up.

MOVEMENT

PRETEND PLAY

STORYTELLING

CHALLENGES

SENSORY
EXPERIENCES

CONNECTION

A GENTLE REMINDER
FOR PARENTS

Some days will be messy.

Some days will be magical.

Both still count.

Thank you

for being your
child's first and
most important
teacher.

Your love, attention,
and presence
shape their future.

Play with purpose.

Little moments, big impact.
